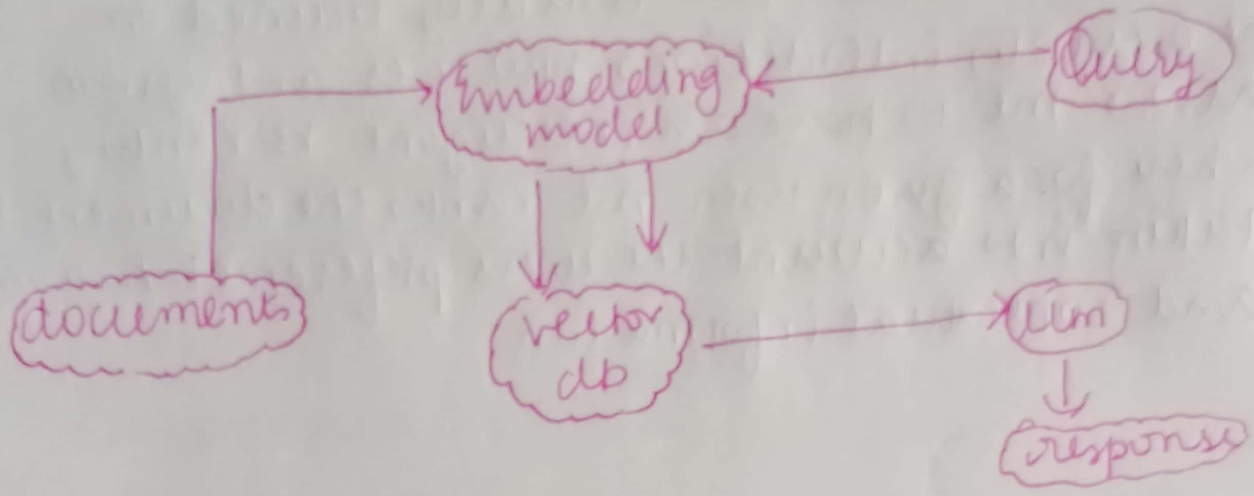
→ Weaknes →

4. Modular Rags

(V1) → Introducing Rag and modularity concept.



(V3) → Decomposing Rag system into independent Modules

→ (1) → transformation of data into embeddings
→ (2) → Vectorisation of user request
→ (3) → data retrieved from the database to generate my summary sentence
→ (4) → vector database

V5 → Benefits and trade-offs to modular Design (Rags)

→ strengths →
(1) Improved Maintainability
(2) Enhanced scalability
(3) faster development

Scanned with OKEN Scanner

→ Weakness →

1. Increased complexity
2. Intial setup time (requires significant time)
3. Potential of redundancy

→ Opportunities →

1. Interaction with new technologies
2. Third-party collaboration
3. Customization and flexibity.

→ Threats →

1. Inter-module communication issues.
2. Security vulnerabilities
3. Dependency management
