Integrating Knowledge Bases for RAGs

Integrating Knowledge Bases and External Data Sources in RAG Systems

D. Brian Letort, PhD

Head of Data Office & Platform AI, Author, & Adjunct Professor

https://www.linkedin.com/in/brian-letort-ph-d-7360202/

Integrating Knowledge Bases for RAGs

Version Check

Version Check

This course was created by using:

- Python 3.10
- VS Code 1.70
- spaCy 3.2
- Hugging Face Transformers 4.15
- PyTorch 2.4.0
- Wikipedia API
- Flask

Aligning and Linking Unstructured Text with Structured Data

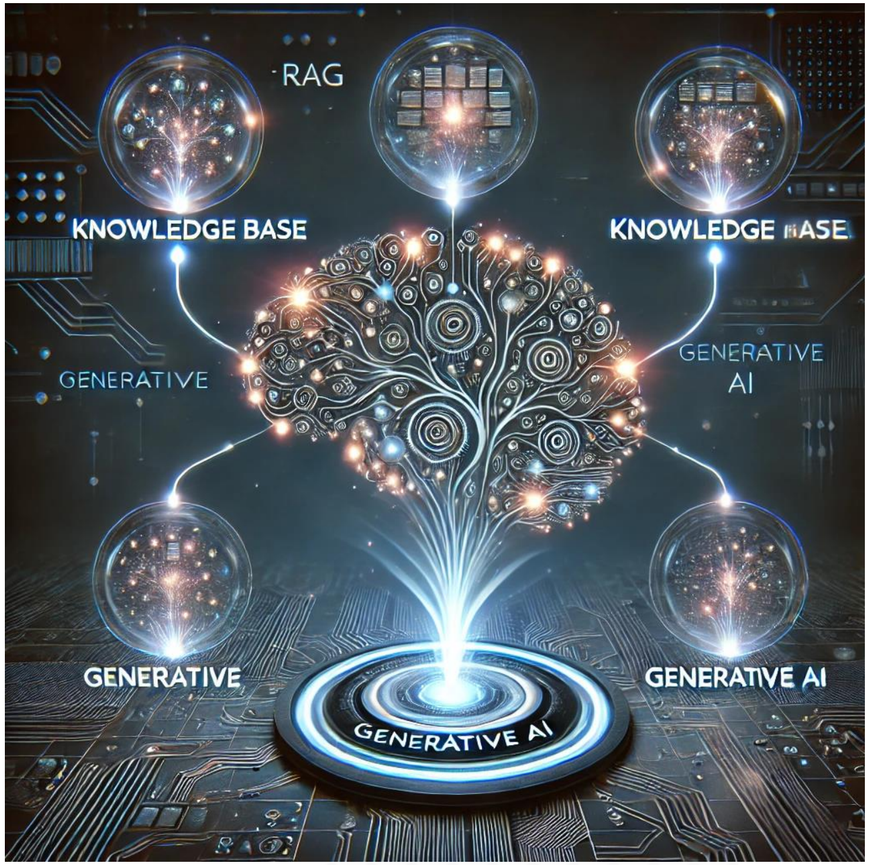
Techniques for Data Alignment

Entity Recognition and Linking

Demo

Aligning and Linking Unstructured Text Data with Knowledge Bases using spaCY

Exploring Methods for Incorporating External Data into RAG



Overview of External Data

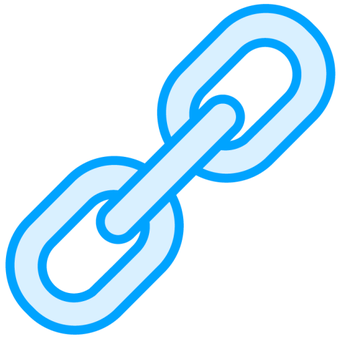
Integration of External & Domain-specific Data

Challenges & Considerations

Demo

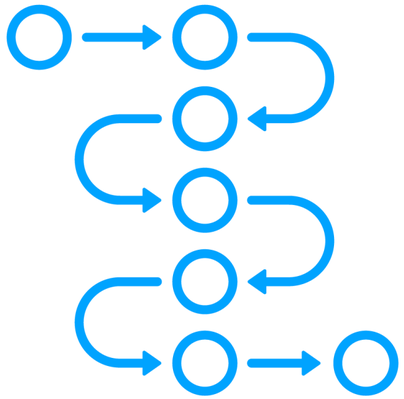
Incorporating External Data

Implementing and Evaluating Knowledge Integration Approaches

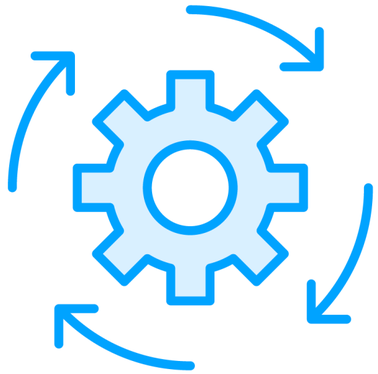


Entity Linking

Knowledge Graph Embeddings



Knowledge Guided Retrieval



Best Practices

Demo

Integrating Knowledge Integration in RAG Systems

Course Conclusion

Reach out on the Discussion tab if you have any questions for me!
